

Download 2008 Mercury 20 Hp Carb Parts

170 Election Road Suite 100 Draper, UT 84020 phone intl_phone (Outside the U.S.A) info@iboats.com Used Outboard Motors. Here at Marine Parts Warehouse, we are always getting in used outboard motors for our technicians to prepare for sale. Below are motors that we currently have ready for sale and sold motors (to give you an idea of the kinds of motors we get). Re: 20 HP Honda - Cold Start Issues It would be great to know what the idle speed is set at. If you are idling too slowly you will get these symptoms. Idle should be as close to 900 as possible and you should be propped to maintain that on your boat when in gear. Also, don't do anything with the twist grip or remote on a cold start. It needs to be completely relaxed or you are defeating the enrichener. I'm looking at two boats with the Mercury 200 EFI Motor. Anyone have any opinions on this motor. Obviously, it's not as efficient as the Optimax, but just wanted to know more about the durability and if anyone's had any major issues with it, or deal breakers because of it.
