

Download Cardiovascular Patient Education Resource Manual

Preamble. The American College of Cardiology (ACC) and the American Heart Association (AHA) are committed to the prevention and management of cardiovascular diseases through professional education and research for clinicians, providers, and patients. HHQI now offers free online learning courses with continuing education credits through HHQI University. These educational courses are evidence-based and focus on improving patient outcomes and quality improvement. Summary Report for: 29-2031.00 - Cardiovascular Technologists and Technicians. Conduct tests on pulmonary or cardiovascular systems of patients for diagnostic purposes. Abdominal aortic diameter ≥ 3 cm typically constitutes an abdominal aortic aneurysm. The cause is multifactorial, but atherosclerosis is often involved. Most aneurysms grow slowly ($\sim 10\%$ /year) without causing symptoms, and most are found incidentally. Risk of rupture is proportional to the size of ...
