

Download Earth Science Guided Study Work

Answers

After completing this lesson, you will be able to explain what science is. You will be able to distinguish between the three branches of natural science: physical, Earth and life science. The crust is a ridiculously thin layer when the Earth's interior is drawn to scale. So small that it wouldn't show up on most diagrams. But despite being tiny compared to the rest of the layers ...Earth is the third planet from the Sun, and the only astronomical object known to harbor life. According to radiometric dating and other sources of evidence, Earth formed over 4.5 billion years ago. Earth's gravity interacts with other objects in space, especially the Sun and the Moon, Earth's only natural satellite. Earth revolves around the Sun in 365.26 days, a period known as an Earth year.
