

Download Exam Respiratory System

Multiple Choice Quiz On Respiratory System Quiz. Small air sacs in the lungs where many capillaries exchange carbon dioxide for oxygen taken into the body. Small spaces in the skull thought to regulate the temperature and humidity of the air taken in to the body. This tube carries air down to the windpipe. Respiratory problems may be caused by disorders of other symptoms and so it may be appropriate to refer also to the separate Cardiovascular History and Examination and Ear, Nose and Throat Examination articles. The main respiratory symptoms are: Dyspnoea (see the separate Breathlessness article). Respiratory examination. In medicine, the respiratory examination is performed as part of a physical examination, or when a patient presents with a respiratory problem (dyspnea (shortness of breath), cough, chest pain) or a history that suggests a pathology of the lungs. It is very rarely performed in its entirety or in isolation; Start by examining the trachea for deviation and for tug. Placing your index and ring finger of the right hand on the head of each clavicle, use the middle finger of the same hand to palpate the trachea in the sternal notch. Roll your finger across the trachea in the axial (horizontal) plane to assess for deviation. Respiratory System Chapter Exam. Exam Instructions: Choose your answers to the questions and click 'Next' to see the next set of questions.
