For K-2 teachers, Treemendous Science! helps young children explore, experience, and collect data to understand how trees grow, the roles trees play in ecological systems, and how humans and trees interact. The Problem Spotter is a great tool to find errors in your family tree. It runs automatically in the background looking for potential issues or errors you might have in your family tree or genogram. **PROVEN AND AWARD-WINNING!** Project Learning Tree is an award-winning environmental education program designed for teachers and other educators, parents, and community leaders working with youth from preschool through grade 12. All that we are able to achieve at FLP is as a result of the phenomenal Team that I am privileged to be surrounded by, as well as the funders that passionately support Family Literacy in Southern Africa.
