

# Download Neuropathic Pain Oxford Pain Management Library Series

Phantom pain is pain felt in a part of the body that has been amputated, or from which the brain no longer receives signals. It is a type of neuropathic pain. The prevalence of phantom pain in upper limb amputees is nearly 82%, and in lower limb amputees is 54%. One study found that eight days after amputation, 72% of patients had phantom limb pain, and six months later, 67% reported it. Associations Between Physical Therapy Continuity of Care and Health Care Utilization and Costs in Patients With Low Back Pain: A Retrospective Cohort Study Gabapentin, sold under the brand name Neurontin among others, is an anticonvulsant medication used to treat partial seizures, neuropathic pain, hot flashes, and restless legs syndrome. It is recommended as one of a number of first-line medications for the treatment of neuropathic pain caused by diabetic neuropathy, postherpetic neuralgia, and central neuropathic pain. Systematic review of randomized controlled trials Welcome to RSDSA's research library which contains the latest published articles on basic and clinical CRPS and RSD-related research, diagnosis, treatment, and management of CRPS and RSD. The articles are arranged in categories such as CRPS and RSD Overview, Chronic Pain, CRPS and Dystonia/Movement Disorders, Ketamine treatment, etc.
