

# Download Place Value Concentration Cards

Activity for ages 4 to 8. For most kids, understanding place value requires lots of practice – it's a pretty complicated concept after all. Place Value Concentration is an easy way to make all of that hard work fun. Grab your freebie by scrolling below and get ready for some serious place value competition.. Getting Ready. Prepping for the game was a cinch. Not only do my third graders know place value, they beg to play this game. On long strips of paper I made place value charts, making sure the commas were in place and writing the words (ones, tens, hundreds, etc.) under the blank line where a number will be placed. Concentration, also known as Match Match, Match Up, Memory, Pelmanism, Shinkei-suijaku, Pexeso or simply Pairs, is a card game in which all of the cards are laid face down on a surface and two cards are flipped face up over each turn. The object of the game is to turn over pairs of matching cards. Concentration can be played with any number of players or as solitaire. Help your students to develop a conceptual understanding of place value and rounding with this three week place value and rounding unit! This product includes three weeks of math instruction that is written in an easy to follow format. The lessons are written to give students a solid foundation in ...
