The operative report is truly a goldmine of information. This is true in ICD-9, and it will be even more important in ICD-10, when coders will need to look for more specific anatomical information, as well as additional details about the procedure itself. Medtronic has compiled this sample operative report information for you as an example only. It should be modified to reflect your clinical practice and the procedures performed for an individual patient. to determine coverage and submit appropriate codes, modifiers, and charges for the services that were rendered.
