Spectrum. Black-body radiation has a characteristic, continuous frequency spectrum that depends only on the body's temperature, called the Planck spectrum or Planck's law. The spectrum is peaked at a characteristic frequency that shifts to higher frequencies with increasing temperature, and at room temperature most of the emission is in the infrared region of the electromagnetic spectrum. 19th-century medicine saw tremendous advances in the fields of surgery, anaesthesia, and sanitation. Social attitudes towards abortion shifted in the context of a backlash against the women's rights movement, and as an expression of medical doctors' desire to increase their power. Abortion had previously been widely practiced and legal under common law in early pregnancy (until quickening), but ...
