

# Download Unit 10 Lesson 01 Volume Of Solids

Math Middle School Resources. Click on a section below to view associated resources. After watching this video, you will be able to explain what density is and calculate the density of solids or liquids from physical measurements. A... Watch this video lesson and you will see that there are different kinds of prisms. You will also learn how to separate a prism into its various parts so you can easily find the surface area. The compound  $H_2O$  (2 molecules of the element Hydrogen combined with 1 molecule of the element Oxygen) can exist in 3 states. They are solid (ice), liquid (water) and gas (steam). This is theoretically true of all elements and compounds. Liquids and gases can be grouped together as Fluids.
