Local management of deep cavity wounds – current and emerging therapies Nicholas Smith*, Joseph Overland*, John E Greenwood Department of Plastic and Reconstructive Surgery, Royal Adelaide Hospital, Adelaide, SA, Australia *These authors contributed equally to this work Abstract: Cavity wounds, defined as a loss of continuity of the skin or mucous membrane with associated tissue loss ...Disclaimer. Oxford University Press makes no representation, express or implied, that the drug dosages in this book are correct. Readers must therefore always check the product information and clinical procedures with the most up to date published product information and data sheets provided by the manufacturers and the most recent codes of conduct and safety regulations. Wound Bed Preparation is an essential process to obtain maximum benefits from today's advanced wound care products. It can be defined as the process of removing local barriers to wound healing e.g. dead tissue, infection, excess exudate, to facilitate healing and provide a more efficient means of wound management. We are change-makers, educators, and inventors. The Angiogenesis Foundation is the leading nonprofit organization disrupting disease through angiogenesis, the process the body uses to grow new blood vessels.
